Command User List

The following request for proposal is for Wireless services. All responses shall be based on the terms of your current contract Spiral 2 contract. All submitted responses or questions in regards to this notice shall specify the solicitation number stated above. This notice contains the requested items, period of performance and all applicable evaluation factors. All contractors' submissions shall be evaluated on the factors specified herein and based on the terms of their existing contracts. All pricing submitted shall not exceed that of which is specified on the stated ELINS in any contractors given contract. In addition, contractors are advised to not provide pricing on items that are outside of the scope of their contract or provide pricing for items when the ceiling specified on their base contract is reached.

1. General Information

Please provide all responses to this notice to the following Ordering Activity: (if there are alternate POCs, include their information as well)

|---|---|

Terminations of Task Orders shall be in accordance with FAR 52.212-4, incorporated into all contracts by reference.

2. Task Order Period of Performance

The services for the Task Order base period shall begin 1 October 2017 including delivery of any new equipment, and shall end on 30 September 2018; CLIN 0006

The requested service shall begin 1 October 2017 including delivery of any new equipment, and shall end on 30 September 2018.

***For the base period: If start dates stagger due to porting and the transitioning, the first and the last month shall be prorated.**

3. Statement of Requirements

The 4th Marine Corps District has a requirement for wireless service in their Command Area of Responsibility for wireless phone services. The terms of the Performance Work Statement from the Navy FLC Wireless contracts apply in its entirety.

Contractors shall fill out the pricing requested on the attached RFP ELIN Worksheets, and the International Competition Table (if included); sub-ELINs based on specified KNOWN International requirements shall be included with your proposal. The unit prices listed in the table is the maximum price for the countries minutes/Kbytes etc. that can be charged on the Task Order unless and until contractor provides the Ordering Officer and COR written support for any price increase within a reasonable time period. No upward adjustments shall be made retroactively.

The Government has included quantities, salient characteristics and purchase descriptions for every non-specified item on the Other Plan (including the NTE amount for International, i.e. "budget amount"). The Government will review all prices for reasonableness (which may include balance and realism) and reserves the right to conduct negotiations. The Government may compare prices proposed in the International Competition Table with actual invoiced prices to establish accuracy and reasonableness for those items. Where there is a significant amount of KNOWN International requirements, the proposed pricing for the KNOWN services may be the total amount for the International ELIN rather than the NTE amount in the Task Order award.

4. Basis of Award

The source selection action will be pursuant to FAR 16.5, and selection will be made through competition between the three (3) Navy FLC contract holders. Award will be made to the responsible and responsive offeror(s) whose proposal represents the Best Value to the Government, price and non-price factors considered.

The following evaluation factors will be utilized, along with their relative importance:

1. Signal Strength (Factor 1)
2. Coverage (Factor 2)
3. Price (Factor 3)

Signal Strength is the magnitude of the electric field at a reference point that is at a significant distance from the transmitting antenna. Depending on various factors, such as proximity to a tower, obstructions such as buildings or trees, etc., the signal strength will vary.

Coverage is defined as the ability of the phone to connect to voice and networks in the home area of coverage, while standing outside. If coverage is available but the phone is not able to connect inside the workspace the wireless carrier shall provide Microcell devices at no additional cost.

Relative order of importance:

Factor 1 (signal strength) is more important than factor 2 (coverage). Factor 2 (coverage) is more important than factor 3 (price). When combined factor 1 (signal strength) and factor 2 (coverage) are significantly more important than factor 3 (price).

Coverage will be evaluated based on coverage information (Coverage Maps) provided by the wireless carriers, and, if necessary, coverage information retrieved from each carriers respective website.

Signal strength will be evaluated based on decibels. The decibel rating scale below will be utilized for the required addresses provided in this Request for Proposal:

DECIBAL	RATING
0 to -75 db.	Best
-75 to -85	Good
-85 to 98	Moderate/Acceptable
98 and below	UNACCEPTABLE

The contractor shall have satisfactory Past Performance. The government intends to award one (1) Task Order (TO) as a result of this RFP. However, if it is determined to be in the Governments best interest, the Government reserves the right to issue multiple awards.

Task Order award will be made to the responsible offeror in accordance with the above. The Government reserves the right to award without conducting negotiations and/or discussions.

Please be advised that any offered discounts or reductions must be reflected in the offered price. Any discounts offered but not effective until some date after award of Task Order will be taken by the Government, but not included in the price analysis nor reflected in the evaluated price. To be considered in the price evaluation and reflected in the evaluated price, discounts/reductions must be shown in the proposal as the offered price. Preferably at the ELIN level so the Ordering Officer knows how much funds to obligate, and the COR can validate and certify that invoices are correctly submitted.

5. Instructions to Offerors

For proposal purposes the estimated date of Task Order award is anticipated with a period of performance start date of 1 October 2017..

To be evaluated for technical acceptability the offer must complete the attached ELIN worksheet and provide their Signal strength for the attached Command User Phone List.

Proposals must be submitted electronically no later than **18 August 2017 no later 1600 EST** via electronic communication. In order to maximize efficiency and minimize the effort involved in the proposal evaluation process, all Offerors must comply with the following instructions for proposal format and content. Proposals that do not comply may be considered non-responsive and may render the offer ineligible for award.

Proposal is due: **18 August 2017 no later than 4:00 PM EST to email address: denise.hill@usmc.mil**

Late proposals shall be handled in accordance with FAR 52-212-1.

Proposals shall include the following completed elements: (Check those that apply)
